IDENTIFIERS \*Virginia

## ABSTRACT

Statistical data on in-state, first-time freshmen at Virginia's four-year institutions and Richard Bland College, entering in 1992-93, are presented. The first table summarizes the academic performance of students for identified private high schools, by area. The second table summarizes the academic performance of students for identified public high schools, by school district. Data in each table include: number of first-time freshmen enrolled in fall 1992, number and percentage who took remedial courses, percentage who returned in the spring of 1993, median grade point average, number and percentage with grade point averages greater than 2.5, median credit hours, and number and percentage with credit hours greater than 30. ## Academic Performance Characteristics

### Explanation of Data

The enclosed information is based on data submitted to the Council of Higher Education by state-supported institutions of higher education. These data represent in-state, first-time freshmen at the public four-year institutions and Richard Bland College. By definition, a first-time freshman is one who is attending college for the first time and may not necessarily have graduated from high school in the previous spring. Most of the students at these institutions are recent high-school graduates.

At the twenty-three community colleges which comprise the Virginia Community College System (VCCS), these data represent a different pool of students than those reported in previous academic performance tables. **Previous reports failed to include a number of VCCS students enrolled in remedial coursework.** This year's report includes all VCCS students who graduated from high school during 1991-92, which significantly increases the number of students taking remedial coursework.

The first table summarizes the academic performance of students for the identified private high school by area. The second table summarizes the academic performance of students for the identified public high school by school district.

In order to maintain confidentiality, institutions with less than a total count of three (3) students were excluded from this report.

High School Type: Private
